

Hanbit Solutions

Customer and Market Position

- Hanbit Solutions is a leading provider of innovative technology with focus on Smart Metering solutions

Application Solutions and Business Case

Application

- Walk-By Automatic Meter Reading System (865 MHz)
- Challenge Solved: Supply a customized radio solution compatible with a third-party implementation that was not well documented.

CUSTOMIZABLE
PRODUCTS

Benefits of using the Radiocrafts module

- Proven, pre-certified module for a fast to market experience
- Customized module from Radiocrafts' world class support and design services
- Wireless M-Bus Protocol compliance = One-stop partner for HW and SW

Business

- Walk-By Automatic Meter Reading System for large scale deployments in the Indian market.

End Equipment

Wave Walk-By AMR System

Currently deployed in the following countries:

- India

Quote: "With confidence in Radiocrafts technology and team, we bid for and won a tender where the bid winner should supply 10k walk-by AMR devices for gas metering complying with the existing supplier's protocol. Unfortunately, the details provided in the tender were insufficient for implementing the protocol. However, with great support and expertise from Radiocrafts we successfully completed the project to the client's satisfaction. It was well appreciated by the client, that with strong effort by Hanbit and Radiocrafts, this project was possible to execute despite the many challenges. This experience has definitely boosted my confidence in Radiocrafts and strengthened our relationship to a different level. A big thanks for Mr. Peder Martin Evjen and the Radiocrafts team." – Phani Varanasi, CEO
