

# SUEZ – Smart & Environmental Solutions

# **Customer and Market Position**

 World leading water and waste management service provider offering intelligent solutions and expertise to support regions in their environmental and digital transformation

# Application Solutions and Business Case

#### <u>Application</u>

- Acoustic Logger Transmitter (169 MHz)
- Challenge Solved: Fast to market, high quality product releases through quick and easy integration of the Wize radio protocol, including customization of the module.

#### Benefits of using the Radiocrafts module

- Proven pre-certified modules that save you a lot of R&D investment and will take you fast to market
- Customized module from Radiocrafts' world class support and design services
- Wize Protocol compliance = One-stop partner for HW and SW

#### Business

• Acoustic Logger Transmitter for large scale global deployments.

## **Acoustic Logger Transmitter**

Already deployed in several countries including but not limited to:

- France
- Morocco
- Martinique

Application page

## Resources and Collaterals

- RC1702HP Datasheet
- Application Notes: <u>019</u>, <u>021</u>, <u>024</u>, <u>041</u>, <u>043</u>
- Knowledge Base / Q&A: Wize Knowledge Base
- White Papers: <u>018</u>, <u>016</u>, <u>012</u>, <u>011</u>, <u>010</u>
- Webinars: The Wize Ecosystem: Wize Protocol and Products

Quote: "Radiocrafts modules allowed us to develop products quickly and efficiently when the projected quantities were limited and could not support the NRE of a full radio product development, and, when the timeline of the project could not allow for a complete development. Especially, the precertification of the modules is a strong benefit." – Samuel Loyson, Head of Smart Metering
