

# Testo

## Customer and Market Position

- Global market leader in the field of portable and stationary measurement solutions

## Application Solutions and Business Case

### Application

CUSTOMIZABLE PRODUCTS

- Comprehensive monitoring system of audit-relevant environmental parameters (868 MHz)
- Challenge solved: Reliably measure and record all audit-relevant environmental parameters to meet regulatory requirements, allowing employees/staff to focus on real value-adding tasks

### Benefits of using the Radiocrafts module

- Fast to market, proven quality, VIP support
- Customized module from Radiocrafts' world class design services
- RC18x0 module series is a flexible platform in the Sub-GHz bands, suitable to comply with a large number of standards including IEEE802.15.4g, Wireless M-Bus, and more

### Business

- Environmental monitoring system for large scale deployments in the global market

## End Equipment

### testo Saveris Pharma environmental monitoring system

Already deployed in several countries including:

- Germany
- US/Canada
- India
- South Korea
- Australia
- Japan
- South Africa
- China
- Russia

**Quote: “The Radiocrafts module is a vital part of our testo Saveris Pharma environmental monitoring system providing a self-sufficient radio network which has an outstanding range and signal robustness for use in closed spaces. In addition, using a readymade module simplifies the design, test, production, maintenance, and radio certification.” – Axel Bärmann, Senior Project Manager**
